Lithops

begins to enter

Fall

plant is absorbing water from old leaves

Winter

no water should be given at all

can flower this time if year- if 3+ **y.0**

4-5 hours of direct sun in early day

> ideally planted in groups with rounded stones

dormancy

dormant

little to no watering (water only if shriveled)

begin watering in early-mid August

> it is safe to remove old leaves when they are paper thin

never water deeply when plant is dormant
